50Days-coding-challenge

Day-32[Python]

Name:M NITHIN

Coding Challenge

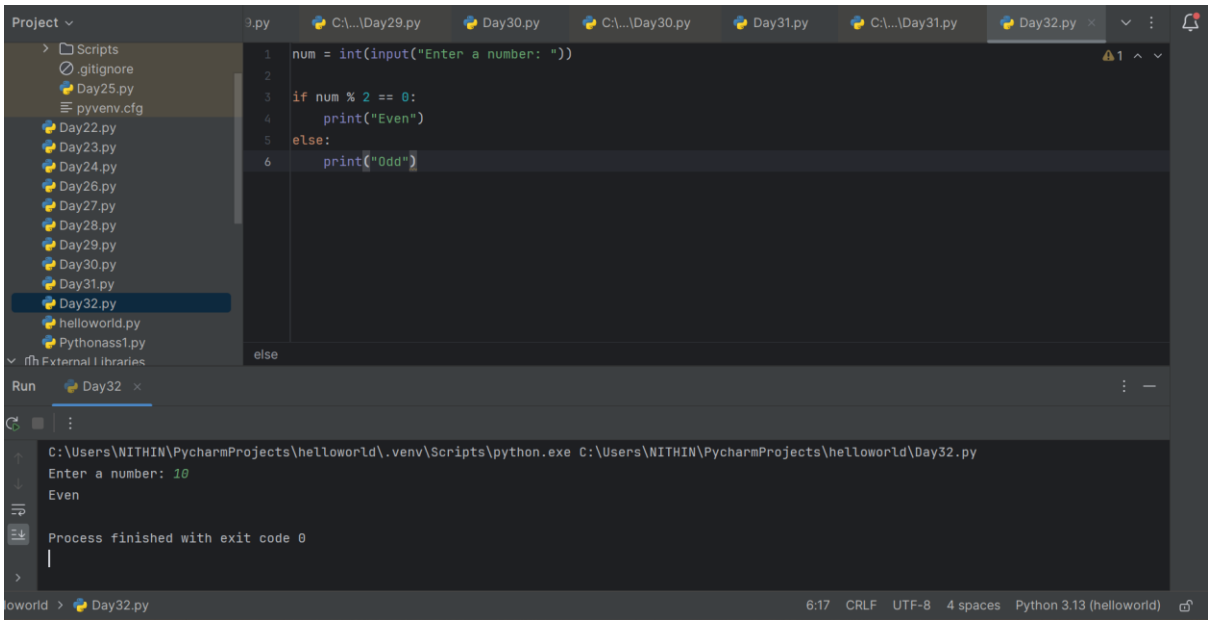
Level 1: Understanding Logic

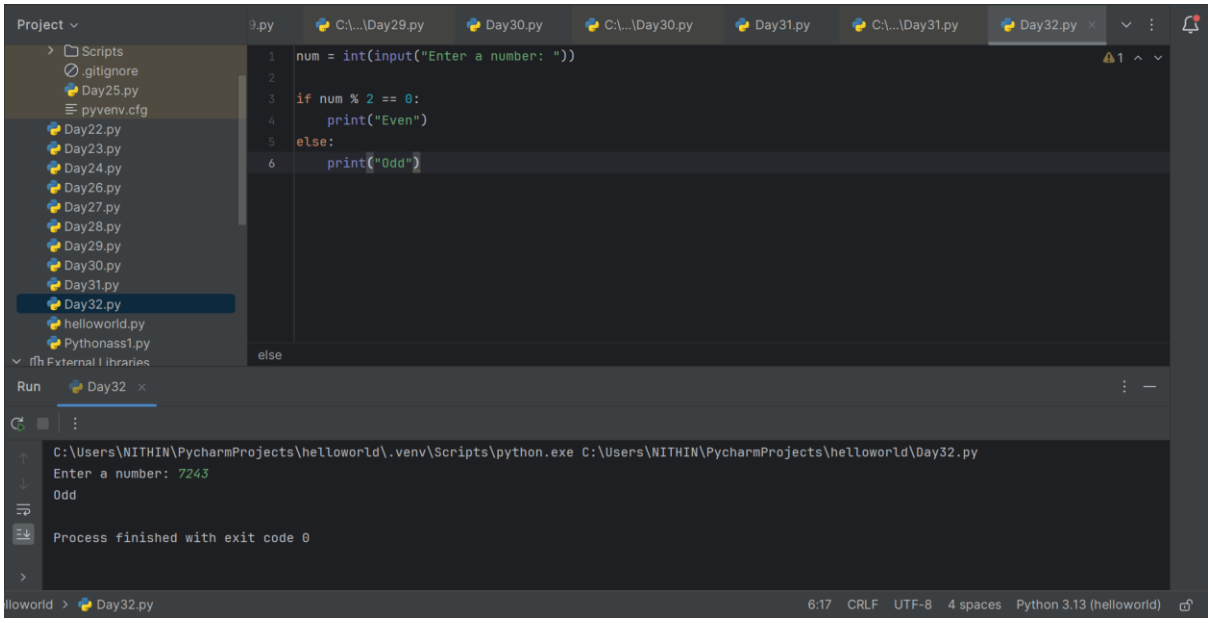
1. **Even or Odd Checker**

Write a program that takes a number and prints:

- "Even" if divisible by 2
- "Odd" otherwise

Concept: if condition





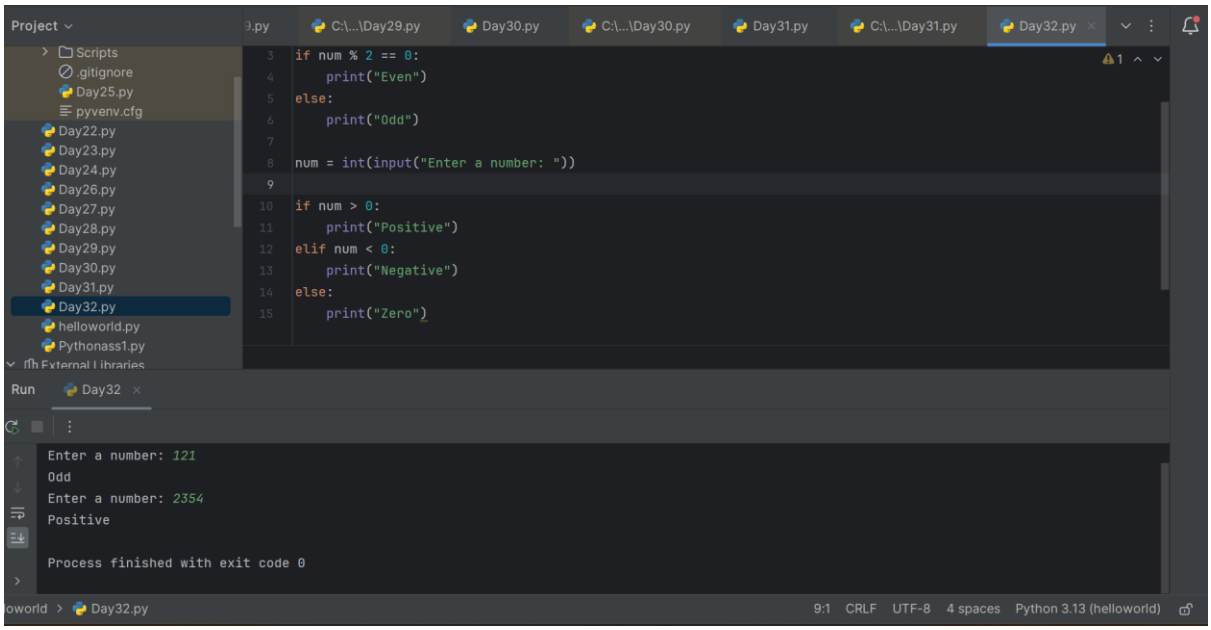
---

2. Positive, Negative or Zero

Take a number and print:

- "Positive"
- "Negative"
- "Zero"

Concept: multiple if-elif-else



---

3. Print Numbers from 1 to N

Take a number N and print numbers from 1 to N using a while loop. *Concept:* while loop basics

```
if num > 0:
    print("Positive")
elif num < 0:
    print("Negative")
else:
    print("Zero")

n = int(input("Enter N: "))

i = 1
while i <= n:
    print(i, end=" ")
    i += 1
```

```
Odd
Enter a number: 2345
Positive
Enter N: 12
1 2 3 4 5 6 7 8 9 10 11 12
Process finished with exit code 0
```

Level 2: Real Thinking

4. Sum of First N Numbers

Input: N

Output: sum from 1 + 2 + ... + N

Use while loop

```
    print(i, end=" ")
    i += 1

    n = int(input("Enter N: "))

    i = 1
    total = 0

    while i <= n:
        total += i
        i += 1

    print("Sum:", total)
```

```
Positive
Enter N: 12
1 Enter N: 3
Sum: 6

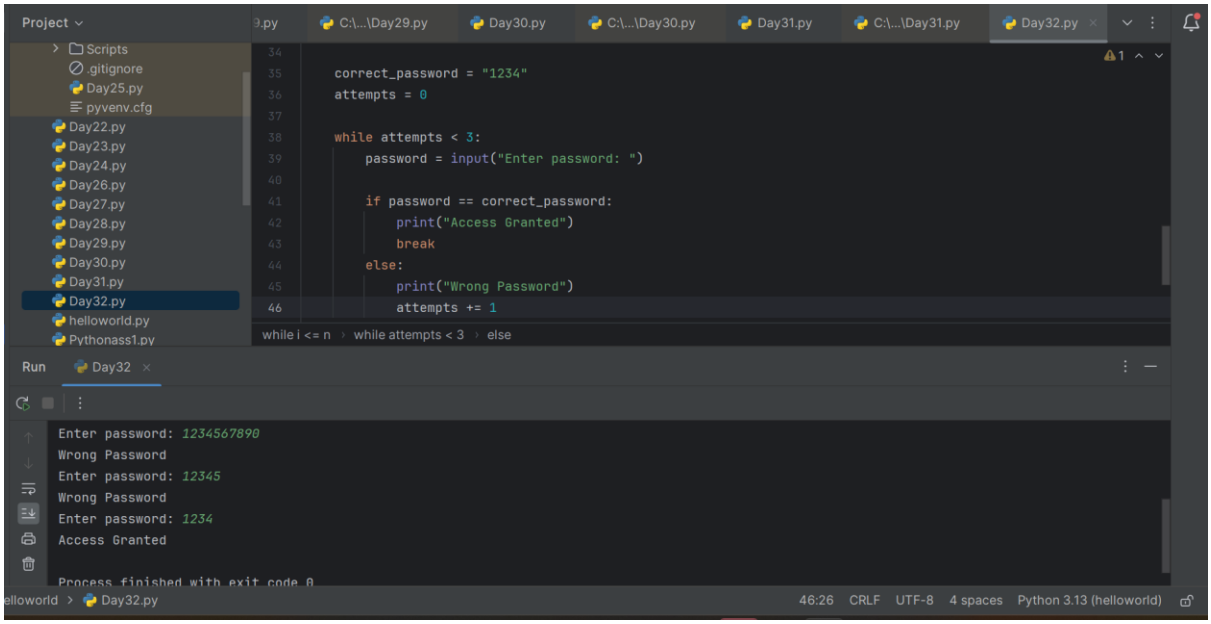
Process finished with exit code 0
```

5. Password Retry System

Ask user to enter password:

- If correct → print "Access Granted"
- If wrong → ask again
- Stop after **3 attempts**

Concept: while + if + counter



---

6. Multiplication Table

Input: a number

Output: print its table up to 10

Example:

5 x 1 = 5 5 x 2 = 10

...

Concept: loop + formatting
