50Days-coding-challenge

Day-8[Power BI]

Insights Report – Logistics Dashboard

Key Findings:

- On-time delivery rate is 49%, indicating high delays
- North region has the highest average delivery time
- Cities like Kolkata, Mumbai, and Chennai show more delays
- Several shipments are delayed by more than 2 days
- Total delivery cost (322.98K USD) is high despite low efficiency

Recommendations

- Improve delivery efficiency in North region
- Focus on reducing delays in major cities
- Optimize routes and delivery planning
- Reduce costs by minimizing delays

Conclusion

Delivery performance needs improvement, especially in reducing delays and optimizing costs.
